ABOUT US

CONTENTS

● Mechanical Pressure Control

R&D Center

Mainly researches and develops mechanical pressure control products, which are widely used in HVAC, building automation, water treatment, automobile braking, household appliances, industrial automation, and other fields.

● Digital Sensing

R&D Center

Mainly researches and develops electronic digital sensing and control products, which are widely used in environmental control, intelligent equipment, security linkage, IoT, data centers, and other fields.

● Fluid Mechanics

R&D Center

Mainly researches and develops micro-pump products, which are widely used in water purification, furniture comfort environment, automatic water circulation, small scale irrigation, vehicle water circulation, and other fields.

LEFOO was founded in 2000. It is a high-tech enterprise integrating R&D, manufacturing and sales. It is entitled "Professional, Specialized, and Innovative" Small-giant Enterprise by the Ministry of Industry and Information Technology.

LEFOO mainly engages in the development, design and production of products in various fields such as mechanical structure control, digital sensing, micro pumps, and others. Products are widely used in high-end equipment manufacturing fields, such as environmental control, mechanical equipment, smart equipment, home appliances, medical care, electric power, IoT, and data centers.

LEFOO has multiple system certifications, such as ISO9001, TS16949, ISO45001, ISO14001, and internationally recognized safety certifications, such as 3C, UL, CSA, CE, and TUV. LEFOO has acquired more than 130 patent certifications, including 9 invention patents. LEFOO's market covers more than 80 countries and regions in North America, Europe, Asia, South America, Africa, and has established strategic partners with many excellent international Companies. LEFOO adheres to the concept of "quality is the life of an enterprise, technology is the driving force of the enterprise", commits to providing customers with reliable and exquisite products and services to meet the growing market demand.

LOW DIFFERENTIAL PRESSURE TRANSMITTERS

PRODUCT OVERVIEW

LEFOO Low Differential Pressure Transmitter uses high-precision MEMS sensors, digital pressure acquisition and temperature compensation methods; it has the characteristics of sensitive pressure response, long-term stable output, and superior temperature performance. It can detect positive pressure, negative pressure, and differential pressure, widely used for monitoring air or neutral gases. Suitable for HVAC, energy management systems, VAV and fan control, environmental pollution control, static pipelines, clean rooms, operating rooms, dust-free test rooms, smoke hood control, oven pressurization and furnace ventilation control fields.

PRESSURE TRANSMITTERS

PRODUCT OVERVIEW

LEFOO Pressure Transmitters are widely used in fluid pressure measurement systems, such as fire protection, water treatment, water supply, pneumatic devices, factory automation, using ASIC technology, MEMS technology, and digital compensation technology. It can measure gas, water, oil and other media that are non-corrosive to stainless steel, and can be used in various complex environments.

PRODUCT OVERVIEW

LEFOO Smart Differential Pressure Transmitter uses monocrystalline silicon sensing element made of Germany advanced MEMS technology and has a built-in temperature compensation element. It provides extremely high measurement accuracy and long-term stability under a wide range of static pressure and temperature changes. It can be used to measure the level, density, and pressure of liquids, gases, or steam. It is widely used in many fields such as industrial process control, automated manufacturing, aerospace, automobiles and ships, petroleum and petrochemicals, electronics and electricity, and medical and health care.

DIGITAL PRESSURE SWITCHES

PRODUCT OVERVIEW

LEFOO Digital Pressure Switches series uses high-reliability measuring cell for pressure measurement. The signal is processed by the back-end circuit and displayed on the screen, and the relay output is automatically controlled according to the pressure change. This series of products adopts full engineering plastic shell and a high-contrast LCD digital display, allowing the product to be used in various industrial situations. It provides a variety of connection methods to fully meet various specific installation needs. It has a variety of built-in settings, allowing users to adjust working parameters by themselves, which is flexible and convenient. This series of products has the characteristics of vibration resistance, long life, simple operation, strong stability and clear display.

PRODUCT PARAMETERS

Digital Pressure Switch

MODEL	LFDS62
Medium	gas or liquid compatible with 1Cr18Ni9Ti, nylon, fluoroelastomer or nitrile rubber
Pressure Range	0~10Bar、0~16Bar
Accuracy	±1%F.S
Working Environment	-10°C~50°C
Output Mode	AC output, the output voltage is consistent with the power supply voltage
Protection Grade	IP55

Digital Pressure Switch

MODEL	LFDS63	LFDS65
Medium	gas or liquid compatible with 1Cr18Ni9Ti, Nylon, Fluorine rubber or Nitrile Rubber	Vacuum Type (negative pressure): non-corrosive dry gas. Positive Pressure Type: gas or liquid compatible with 1Cr18Ni9Ti, copper, fluorine rubber or nitrile rubber
Pressure Range	Vacuum Type (negative pressure): -101~0kPa Medium Pressure Type: 0~1...5MPa	Vacuum Type (negative pressure): -101~0kPa Positive Pressure Type: 0~2.0MPa
Accuracy	±1%F.S	±1%F.S
Working Environment	-10°C~50°C	-10°C~50°C
Output Mode	single AC output (active charge), single switch output	relay output, AC output
Protection Grade	IP54	IP54

TEMPERATURE&HUMIDITY/TEMPERATURE TRANSMITTERS

PRODUCT OVERVIEW

LEFOO Temperature&Humidity/Temperature Transmitter is specially designed for temperature and humidity detection. Different installation methods available, such as wall-mounted, duct type, room switch box, and outdoor, easy to operate. It has special design for lightning surge, electrostatic discharge, group pulse, voltage resistance, etc., with strong anti-interference ability. Multiple output modes available, including current, voltage and RS485. It is widely used in communication server rooms, buildings, warehousing, and other places where temperature&humidity measurement needed.

GAS DETECTING TRANSMITTERS

PRODUCT OVERVIEW

LEFOO Gas Detecting Transmitters have the characteristics of high precision, high stability and fast response, and can monitor and accurately measure the concentration of carbon monoxide, carbon dioxide, PM2.5, formaldehyde and other gases in real time. Different models of products are suitable for wall-mounted, air duct, indoor, outdoor and other installation forms, making it easy for users to choose according to actual needs. These transmitters are widely used in environmental monitoring, indoor air quality control, industrial safety production and other fields.

PRODUCT PARAMETERS

Wall-mounted Carbon Monoxide Transmitter		Room Carbon Monoxide Transmitter
MODEL	LFG101	LFG103
Measuring Range	0-500ppm/0-1000ppm	0~100ppm/0~250ppm/0~400ppm
Accuracy	±5%F.S@25°C	±5%FS

Protection Grade	IP30		

AIR VELOCITY TRANSMITTERS

PRODUCT OVERVIEW

LEFOO Air Velocity Transmitter has the characteristics of high precision, fast response, and strong stability. It can measure wind speed in real time and output a standard signal. Different designs(standard model, low-speed, and Explosion-proof) to meet the needs of different applications. It plays an important role in meteorological observation, environmental monitoring, industrial production and other fields, providing data support for wind energy utilization, ventilation system optimization, and production safety monitoring. Compact structure and easy installation also make it suitable for various complex environments, an ideal choice in the field of wind speed measurement.

PRODUCT PARAMETERS

FLOWMETERS

PRODUCT OVERVIEW

LEFOO Flowmeters are used to measure fluid flow, with characteristics of high precision, fast response and wide applicability, simple structure, easy installation and stable operation. Various models, including Electromagnetic Flowmeter, Vortex Flowmeter, Turbine Flowmeters and other types, with wide applications, such as industrial production, environmental monitoring, energy measurement, etc., providing reliable data support for industrial production.

PRODUCT PARAMETERS

Electromagnetic Flowmeter

Vortex Flowmeter

MODEL	LFLD	LFLUGB
Nominal Diameter	10-3000mm	20-300mm
Max Flow	15m/s	10m/s
Nominal Pressure	1.6MPa、1.0MPa、0.6MPa	4.0MPa、2.5MPa、1.6MPa、0.6MPa
Accuracy	0.5%	1.0%
Output Signal	4-20mA、HART、RS485	4-20mA、HART、RS485、pulse
Environment Temperature	-10°C-60°C	-10°C~60°C
Flange Material	carbon steel, stainless steel(304, 316, 316L)	carbon steel, stainless steel(304, 316, 316L)
Protection Grade	IP65、IP68	IP65

Turbine Flowmeter

MODEL	LFLWGY
Nominal Diameter	4-300mm
Max Flow	10m/s
Nominal Pressure	10MPa、6.3MPa、2.5MPa、1.6MPa
Accuracy	1.0%
Output Signal	4-20mA、HART、RS485、pulse
Environment Temperature	-10°C~60°C
Flange Material	carbon steel, stainless steel(304, 316, 316L)
Protection Grade	IP65
