

# LF10-L

Air compressor  
Pressure switch

**LEFOO**

Dimension in:mm

The LF10-L pressure switch is a pressure-operated electric switch for use in regulating the tank pressure between two preset values on electrically driven air compressors. It is available with an unloader valve, which prevents compressors from starting under load, and an On-Off button for manual cut off the compressor. A four port manifold style is available.

## LF10-L Order Ref NO
