

Dimension in:mm

T2000W pressure transmitter is specially designed for constant pressure frequency water supply system. With stainless steel housing, buffer screw and anti water hammer, it can be used in the water supply system for pressure sensing, signal receiving, and feedback. T2000W is a high demand, cost effective product for civil use.

Specification

| General | Value |
|-----------------------|--------------------------|
| Measure Range | 0……10bar |
| Accuracy | ±1.0%F.S |
| Output Mode | Three-wired |
| Output | 0.5~4.5V |
| Power Supply | 5VDC |
| Insulation | >100M(Ω)@50V |
| Electrical Connection | Packard, with wire leads |
| Protection Grade | IP67 |
| Pressure Connection | G1/4,G3/8 |

Conversion: 1kgf/cm²=14.2psi 1bar=14.5psi
